## The Evolution and Naked Truth of a Gay Jewish Man

*Not a Still Life* is a portrait of Steve Stone, an older gay, Jewish man who shares the naked truth of the struggles, joys and sorrows of his unconventional life. Steve opens his heart as he tells of childhood ridicule in the 50's, coming out and living openly gay during the decades of the 60s to the 80s— a period rife with homophobia— finding true love, dealing with tragedy and loss, loneliness and aging. His gradual evolution includes embracing sobriety, connecting with a long lost relative and discovering his spirituality only to find that he is in danger of losing his home and business. His entertaining reflections stimulate argument and offer us a refreshing appreciation of love and living.
